

Progression in Subtraction
National Curriculum 2014

	What will subtraction look like?	Notes									
<p>EYFS</p>	<p>Teacher modelling, pictorial representation Practical demonstrations of subtraction relating to 'take away'. E.g. 10 – 1? Use of number tracks. Vocabulary of subtraction in practical activities</p> <p>Find one less than a number by counting back. Using numbers on a washing line or jumping back on a number track</p>  <p>Relate subtraction to finding how many are left when some are removed. I have 6 sweets. I eat 2. How many are left?</p>  <p>Relate subtraction to finding the difference in practical contexts</p>  <hr/> <p>Using Numicon as a practical resource.</p>  <p>Record practical calculations by drawing pictorial representations.</p>  <p>Begin to use – and = signs to record calculations</p>	<p>The guidance in italics is taken from the non-statutory guidance in the National Curriculum in England document for 2014</p>									
<p>Y1</p>	<p>Number tracks leading to number lines introduced for recording 'jumps' back. (Counting Back underneath and counting forwards on the top)</p> <table border="1" data-bbox="220 1809 895 1861"> <tr> <td>1</td> <td>2</td> <td>3</td> <td>4</td> <td>5</td> <td>6</td> <td>7</td> <td>8</td> <td></td> </tr> </table> <p>Can you count back 5? Take away 5. Difference introduced practically and then on number tracks and lines, e.g. 12 – 7 (Counting Forwards)</p> <p>Can you make a rod 12 blocks long? My block is 7 blocks long. What's the difference?</p> 	1	2	3	4	5	6	7	8		<p><i>Pupils memorise and reason with number bonds to 10 and 20 in several forms (e.g. 9 + 7 = 16; 16 - 7 = 9; 7 = 16 - 9). They should realise the effect of adding or subtracting zero. This establishes addition and subtraction as related operations.</i></p> <p><i>Pupils combine and increase numbers, counting forwards and backwards.</i></p> <p><i>They discuss and solve problems in familiar practical contexts, including using quantities.</i></p> <p><i>Problems should include the terms put together, add, altogether, total, take away, distance between, more than and less than, so that pupils develop the concept of addition and</i></p>
1	2	3	4	5	6	7	8				

0 1 2 3 4 5 6 7 8 9 10 11 12

Number lines to take away units

Find the difference between 26 and 35

Complementary addition

$31 - 5 =$

Use dienes to practically solve larger problems

ie $57 - 34$

Pupils use concrete apparatus to experience take away and difference in practical activities.

Count out 16 straws. If you give your friend 7, how many will you have left?

subtraction and are enabled to use these operations flexibly.

Y2

Pupils practice finding the difference by counting on using a number line. They are able to choose when to take away and when to find the difference when answering a subtraction problem.

$55 - 27 = 28$ $27 + ? = 55$ $55 - ? = 27$ $? + 26 = 55$

(b) Pupils use concrete apparatus to explore exchange in practical activities. E.g. Subtract 18p from 33p

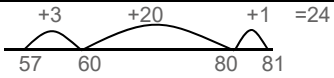

(c) Pupils begin to organise their subtractions using expanded columnar methods

$$\begin{array}{r} 87 - 54 \\ \underline{-50} \quad 4 \\ \underline{30} \quad 3 \end{array}$$

Pupils extend their understanding of the language of addition and subtraction to include sum and difference

Pupils practise addition and subtraction to 20 to become increasingly fluent in deriving facts such as using $3 + 7 = 10$, $10 - 7 = 3$ and $7 = 10 - 3$ to calculate $30 + 70 = 100$, $100 - 70 = 30$ and $70 = 100 - 30$. They check their calculations, including by adding to check subtraction and adding numbers in a different order to check addition (e.g. $5 + 2 + 1 = 1 + 5 + 2 = 1 + 2 + 5$). This establishes commutativity and associativity of addition.

Recording addition and subtraction in columns supports place value and prepares for formal written methods with larger numbers.

<p>Y3</p>	<p>(a) $81 - 57 =$ difference</p>  <p>(b) $81 - 57 =$ take away</p> <p>$81 = 80 + 1$ "1 take away 7 is tricky so exchange"</p> $\begin{array}{r} 81 \\ - 57 \\ \hline \end{array}$ $\begin{array}{r} 70 & 11 \\ \cancel{80} & \cancel{1} \\ - 50 & - 7 \\ \hline 20 & 4 = 24 \end{array}$ <p>and check answers with inverse.</p> <p>Pupils progress to subtract numbers with up to 3 digits</p> $341 - 123$ $\begin{array}{r} 300 & 30 & 11 \\ \cancel{40} & \cancel{4} & \\ - 100 & 20 & 3 \\ \hline 200 & 10 & 8 \end{array}$ <p>or</p> $341 - 123$ $\begin{array}{r} 300 & 30 & 11 \\ \cancel{40} & \cancel{4} & \\ - 100 & 20 & 3 \\ \hline 200 & 10 & 8 \end{array}$ <p>** Moving onto columnar subtraction (as below) once children are secure and demonstrate good understanding of place value.</p>	<p><i>Pupils practise solving varied addition and subtraction questions. For mental calculations with two-digit numbers, the answers could exceed 100.</i></p> <p><i>Pupils use their understanding of place value and partitioning, and practise using columnar addition and subtraction with increasingly large numbers up to three digits to become fluent</i></p>
<p>Y4</p>	<p>(a) Pupils continue to calculate difference mentally using a number line</p> <p>(b) Pupils progress to using the compact columnar method for subtraction.</p> $784 = 700 + 80 + 4$ $\begin{array}{r} 784 \\ - 56 \\ \hline \end{array}$ <p>adjust from T to O</p> $\begin{array}{r} 700 & 80 & 4 \\ - 50 & - 6 & \\ \hline 700 & 20 & 8 = 728 \end{array}$ $\begin{array}{r} 7 & 1 \\ \cancel{78} & 4 \\ - 56 & \\ \hline 7 & 2 & 8 \end{array}$ <p>Progressing to 4 digit numbers</p> $2754 = 2000 + 700 + 50 + 4$ $\begin{array}{r} 2754 \\ - 1562 \\ \hline 1192 \end{array}$ $\begin{array}{r} 600 & 100 & & & \\ 2754 & = & 2000 & 700 & 50 & 4 \\ - 1562 & & 1000 & 500 & 60 & 2 \\ \hline 1192 & & 1000 & 100 & 90 & 2 \end{array}$ <p>→</p> $\begin{array}{r} 61 \\ 2754 \\ - 1562 \\ \hline 1192 \end{array}$ <p>Pupils use the column method to solve increasingly more complex calculations involving many exchanges, and solve subtractions with at least 4 digits</p> $\begin{array}{r} 5 & 13 & 16 \\ \cancel{64} & 67 & \\ - 2684 & & \\ \hline 3783 & & \end{array}$ <p>Pupils to use the 'Shop Keepers Method' to find the difference when using decimal (£ and p).</p> $\begin{array}{r} £10.00 \\ - £06.75 \\ \hline \end{array}$ <p>5p (£06.80) 20p (£07.00) £3.00 (£10.00)</p> <p>Change = £3.25</p>	<p><i>Pupils continue to practise both mental methods and columnar spacing for addition and subtraction with increasingly large numbers to aid fluency.</i></p> <p><i>Pupils practise using the formal written methods of columnar addition and subtraction with increasingly large numbers to aid fluency. They practise mental calculations with increasingly large numbers to aid fluency</i></p>
