Terrific T-Rex

9 The T-Rex was one of the largest and most powerful
16 meat-eating dinosaurs that has ever lived on our
26 planet. Standing up to a huge six metres tall and
36 at up to twelve metres long, the T-Rex moved
44 quickly with its strong and powerful thighs.
51 Their powerful jaws meant that they could eat
61 their prey in one bite. The T-Rex had quite a large
71 brain and this helped it to hunt better. The T-Rex
80 lived in the forests and river valleys of North
87 America before becoming extinct around sixty-
95 five millions years ago but nobody can agree for
103 sure why all dinosaurs suddenly became extinct
108 at this time.
